DESIGN MICHAEL HILGERS

MICHAEL HILGERS

- After training to become a cabinetmaker and subsequently studying a degree in architecture, Michael Hilgers set up „ldee“ in 2001, his own office for interior and product design. In addition to interior design projects for international fashion labels the Berlin designer has specialised in seeking out previously unfilled product niches and filling them with minimalist purpose-built solutions. Amongst other designs, Hilgers has gained renown for his innovative ideas for balconies.

Best of Best

FLATMATE is also available in black with nature edge.

FOUNTAIN PEN MEETS TABLET PC

When closed, FLATMATE has a floor area of just 0.09 m², therefore making it probably the smallest fully equipped bureau on the market.

Due to its slim depth and sleek, unobtrusive exterior it transforms long hallways into home offices, offers an intimate place for writing letters in the bedroom or serves as a temporary workplace in a weekend home as required. FLATMATE makes practical use of such remaining spaces, which are unsuitable for conventional furniture; due to its compact dimensions this reinterpretation of the bureau is ideal for mobile living users.

An integrated flexible interior with storage space for traditional writing utensils and tablet-pc and Co. combines the

features of a classic type of furniture with the new forms of networked living and working. Complemented by a Bluetooth keyboard (not included) it turns the mobile tablet PC into a stationary ergonomic workspace with integrated power supply; mobile phones can be charged inconspicuously when the work surface is closed.

The glare-free lighting and concealed plug hole are put into operation with the elegant 1,80 meter long black textile cable: plug ,n' work

Behind the side flaps there is space for two 8cm wide standard-sized files, a 17" laptop including accessories and CDs or similar; if required one of the flaps can be provided with a lock. W 71, H 114, D 12 cm

FLATMATE IS AVAILABLE IN 14 STANDARD COLORS

THE FLATBOX - the solution for every working height

FLATBOX is the name of the FLATMATE without the floor unit. It is the ideal solution for every working height. In the nursery, as a sitting workplace or even as a standing workstation - FLATBOX offers the highest comfort. The FLATBOX is affixed to the wall at any height with the help of a V-strip with just 2 screws. Later you can easily adjust the height by relocating the V-strip.

The FLATBOX like the FLATMATE is available in white and black with nature edge or lacquered in 14 standard colors. The interior fitting of the FLATBOX is equal with the FLATMATE.

LAMP AND PLUG HOLE WITH PANEL

Behind a detachable panel is a glare-free workspace light (fluorescent tube) with integrated plug hole. The power is supplied via the textile cable with plug.

FEET AND BASE

Flatmate comes with white, round feet as standard. Alternatively, a plinth panel in melamine white with a birch edge is available.

In the coloured version of the bureau the feet or the panel are the same colour as the corpus.

CABLE

The high-quality textile cable is embedded in the centre of the back wall and has a length of 180 cm, measured from the outer side of the bureau.

FILE COMPARTMENTS

On both sides the bureau has an additional door concealing further storage space. The 3 compartments on each side offer space for an 8 cm wide standard-sized file, a 17" laptop, CDs etc. If required one of the flaps can be provided with a lock.

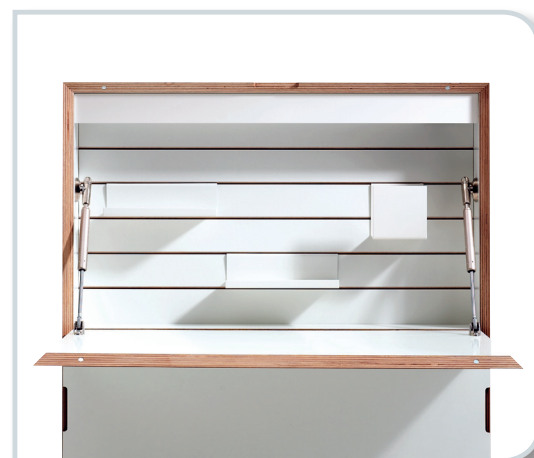

RECESSED GRIP

The two doors on the outer sides and the worktop of the bureau each have a well-designed recessed grip, making it comfortable and simple to open the doors.

WORKTOP AND GAS SPRING FLAP STAYS

The bureau has a large, stable worktop measuring 420 x 710 mm. The high-quality gas spring flap stays ensures the slow, controlled lowering of the worktop.

METAL SET AND BACK WALL

Included with the FLATMATE is a 3-part organisation set (e.g. holder for tablet computer, letter holder, pen rest) made from powder-coated metal. These elements can be flexibly attached to the back wall.

FLATMATE is also available in different colours, e.g. in black.
